

Optimize your Shop Floor Space with...
Slimtainer™ from Snyder!

- **Narrow 23" deep footprint** - Allows for use in tight spaces along bays or between bays.
- **Dispensing outlets on the front and both ends of the tank** - Provides versatility for a wide range of installation options.
- **When stacked two high, top fill is at 84"** - Complies with maximum fill height for many oil suppliers.
- **Translucent tank with molded-in and inked level markers** - Allow for visual level inspection without the need for external site gauges.
- **Constructed from high density FDA compliant polyethylene resin.**
- **Available wall anchor kits** - for added stability and security.
- **Optional 25" wide 110% containment** - complies with EPA/SPCC.

**PATENT NO.
10,370,146**

Slimtainers™ are designed with space in mind. These stackable space saving systems maximize valuable floor space in shops where a narrower footprint is required. Like our stackable Cubetainer systems, the Slimtainers™ will provide safe and efficient storage for a variety of bulk Class IIIB fluids including oils, lubricants, hydraulic fluids, ATF and anti-freeze, all within the narrowest tank footprint on the market! Stackable tanks are cleaner and more reliable than traditional oil drums and allow you to buy in bulk to reduce your total fluid expenses!

Snyder Slimtainer™

Interlocking top and bottom points for secure stacking.

Convenient 2" center fill opening.

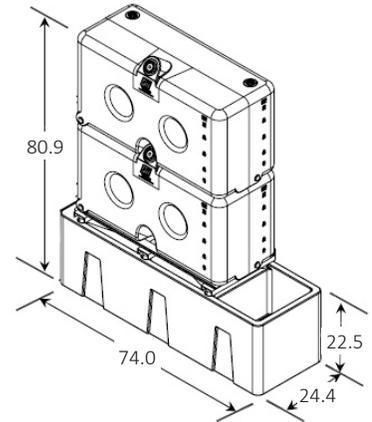

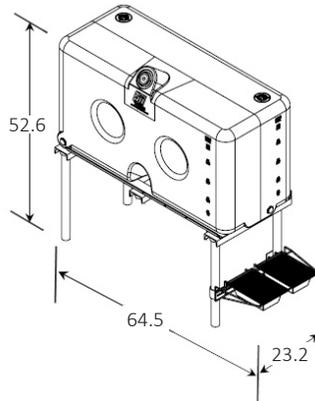

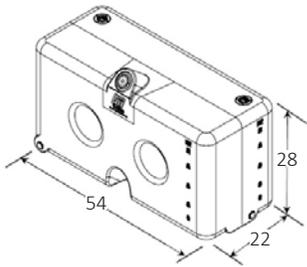

2" top opening for pump or vent application.

Three Molded-in brass 1" NPT Bushings (one on each end and front).

Molded internal pass through holes to suppress bulging and add strength and stability.
