Cubetainer™

Stackable Storage & Dispensing Systems

Snyder Industries is a recognized world leader in the design and manufacturing of highly engineered durable rotationally molded tanks used in a wide variety of industries for over 55 years!

Snyder's Cubetainer™ product line offers cost effective fluid storage solutions for Auto Service Shops, Quick Lube Stores, Fleet Operations and a variety of other industries.

Eliminate Hassles of 55 Gallon Drums

- Messy clutter from drum storage.
- Unused product in each "empty" drum.
- Potential contamination from outdoor drum storage.
- Down-time moving 55 gallon drums.
- Potential injury and workers comp claims from moving awkward drums.

Buy in Bulk: Reduce Your Total Fluid Expenses

A one-time, cost-effective investment will store multiple Class IIIB fluids such as motor oils, lubricants, hydraulic fluids, ATF, Antifreeze, DEF and many other fluids. A refillable bulk storage system also reduces waste from packaged goods.

Optimize Valuable Shop Space

Our space saving stackable fluid systems can open up valuable floor space to allow for additional revenue producing shop work space or the expansion of the number of service bays.

Flexibility to Move Fluids Throughout Your Shop or Forklift Tanks into Trucks

Convert a stationary system into a portable storage system for point-of-use dispensing with either caster wheels or the addition of a forklift/pallet jack pallet base.

Secondary Containment

Provides a clean and safe barrier between the tank and the environment for EPA and SPCC Compliance. Primary tanks combined with secondary containment provide a clean, space saving solution to meet SPCC guidelines and 40 CFR 264.175 requiring 110% capacity of a single primary tank within the containment.

60 gallon tank.

80 gallon tank.

120 gallon tank.

180 gallon tank.

260 gallon tank.

DEPENDABLE, VERSATILE AND DURABLE SPACE-SAVING STACKABLE STORAGE & DISPENSING SYSTEMS

- Constructed from Virgin High Density FDA compliant Polyethylene Resin.
- Standard Footprint with all sizes making them stackable in any combination – No conversion brackets needed which add cost!
- Convenient center fill.
- Translucent tank and molded in and inked level markers allow for visual level inspection without the need for external site gauges.

2" top opening for pump or vent application.

1" opening for desiccant breather or remote fill.

6 molded-in brass inserts allow for side mount pump plate to be attached.

Molded-in brass 1" NPT bushing at drain openings.

Optional pallet is forklift & pallet jack accessible and compatible with all sizes and stand configurations, including competitive products.

Stacking compatible with competitive products.

Interlocking top and bottom ridges for secure stacking.

Convenient 2" center fill opening.

Molded-in and inked site gauge showing both gallons and liters, and semi-transparent material, eliminates the need for external site gauges.

Part No. Brass Inserts	Gallon Capacity	Dimensions
103200N95401	60	36" x 36" x 17 1/2"
1032100N95401	80	36" x 36" x 21 3/4"
1032200N95401	120	36" x 36" x 30 1/2"
1032300N95401	180	36" x 36" x 44"
1032400N95401	260	36" x 36" x 57 1/4"

Options / Accessories

Durable powder-coated steel stands in a variety of leg heights

316SS Spring Valve

Desiccant Air Breather Filter

Gravity Feed Accessories

Drip Tray Kit

Pump System Accessories

Cubetainer™ Gravity Feed Systems

Complete stackable systems that can be ordered with one simple part number.

Cubetainer™ Gravity Feed Systems include stackable tanks, stand with 24" legs, drip tray kit, 316SS spring valves and the gravity feed hose accessory package to complete all connections. Additional stacked combinations can be configured as long as combined stacked height is 82" or less from the stand base (not including the stand legs) to the top of the tank.

Snyder Offers Many Solutions in Fluid Handling

Stationary tanks- 8 to 16,500 gal.

BULK STORAGE & PROCESSING TANKS

For larger stationary applications, Snyder offers the industry's broadest range of tanks – from 8 to 16,500 gallons – in shapes that meet your specific needs. To match your special function requirements, we also market a complete line of accessories, such as stands, seismic tie-downs, ladders, fittings, gaskets, sight gauges, heat tracing and insulation.

Double Wall tanks- 35 to 12,500 gal.

DOUBLE WALL CONTAINMENT TANK SYSTEMS

For outdoor applications or when larger capacity is needed Snyder offers double wall tank-in-a-tank containment systems in one space-saving unit ranging in size from 35 to 12,500 gallons. The double-wall construction is completely enclosed so that external matter such as rainwater, snow or debris is prevented from collecting in the outer containment.

Transportation containers- 60 to 550 gal.

UN/DOT-APPROVED IBCs - STEEL, PLASTIC, & COMPOSITE

Snyder intermediate bulk containers (IBCs) are durable, corrosion-resistant and economical. These long-term, reusable containers are ideal for the transportation of both hazardous and non-hazardous liquid materials, including containers for viscous materials, like greases.

USED OIL COLLECTION TANK SYSTEMS

Unique tank-in-a-tank space saving containment system provides 120% containment of tank capacity to comply with EPA standards for waste oil storage containers CFR 40-279.22. Tanks are maintenance free and won't rust, chip or dent and are weather resistant for outdoor use. Lockable lid design provides outdoor security.

DRUM CONTAINMENT & PALLET PRODUCTS

Drum containment systems for one, two or four drums. Super heavy duty Drum Pallets with drum locators and safety locking systems for stacking. All products are molded of chemical resistant polyethylene and feature a reinforced design and one piece seamless construction for long lasting, heavy use.

ONE SOURCE DOES IT ALL

Whether you are a manufacturer or distributor, Snyder Industries can help you improve the function, economics and performance of your company's bulk handling systems.
