| TASS23 | 300mm |
| TASS21 | 400mm |
| TASS22 | 500mm |

FEATURES AND BENEFITS

- Protect stored rainwater quality
- Sits on top of the tank screen
- Can be secured to the tank screen using the predefined screw holes
- Two pipe inlet cut out holes (90mm or 100mm)
- UV Stabilised material

Installation

WHAT'S IN THE BOX?

- Tank Cover

TOOLS/MATERIALS YOU MAY REQUIRE

- Elbow (optional)
- Tin snips or hole saw

TANK COVER

1. If necessary, install an elbow so that the pipes feeding your tank are angled down towards the tank screen.
2. Using the provided cutting guidelines and tin snips or a hole saw, cut a hole (or holes) in your Tank Cover to fit the pipe/s and/or elbow/s feeding your tank.
3. Lift the pipe/s and/or elbow/s and manoeuvre the Tank Cover into place over your tank screen.
4. Push the pipe/s and/or elbow/s through the cut holes to maintain a sunproof barrier over the tank screen and ensure all water flows through to the screen.

MAINTENANCE

When properly installed, your Tank Cover should be maintenance-free. However, we recommend lifting it up occasionally to inspect and maintain the Tank Screen beneath it.

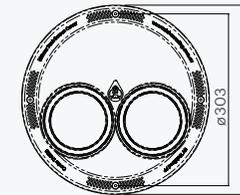

Alternatively, you may wish to consider installing a Maelstrom Filter rather than using a Tank Screen and Tank Cover.

Disclaimer

You acknowledge and agree that the information, data, advice, opinion, plan or other thing (**Material**) provided to you by **Rain Harvesting Pty Ltd (ABN 11 113 300 093) (we, us, our)** is provided "as is" without any representation, warranty, indemnity or guarantee as to the performance, accuracy, timeliness, completeness, merchantability or fitness of the Material for any particular purpose or application.
