Ace Roto-Mold    Injection Molding    Blow Molding    Sowjoy

In response to our customer's feedback, Den Hartog Industries is changing the standard weight of our 305 Gallon Pickup tank to 107 lbs. Both the 305 Gallon as well as the 205 Gallon Pickup tanks will now also feature a new Caution label advising consumers that sidewall support is required. The tank was designed to use the wheel wells of a pickup bed for support. If used as a stand alone tank with no support, the customer may see sagging of the sides in very hot weather.

### 305 & 205 Gallon Low Profile Pickup Tanks

### Side Support Recommendations

All applications must have sidewall support as illustrated in Fig.1. In applications where the chemical to be contained has a specific gravity rating above 1.0 (greater than water) it is recommended that all sides be supported as illustrated in Fig.2.
