Mozzie Stoppa Advanced

90mm TATO70
100mm TATO71
150mm TATO72

Mozzie Stoppa Advanced Max Flow

90mm TATO73
100mm TATO74

Protect your rainwater quality by keeping mosquitoes and other pests out of your tank with this Mozzie Stoppa Advanced, with an easily removable mesh screen for simple maintenance.

The Max Flow variant increases the surface area of the mesh screen so that the flow rate is not restricted and water is able to easily exit. This gives you the benefits of mosquito and pest proofing your overflow without impacting the flow rate.

- Lets your tank breathe safely without the risk of pest contamination.
- 0.955mm stainless steel mosquito proof screen prevents pests from getting into your tank through the overflow.
- Simply pull out the screen to brush or hose off any debris to maintain optimal system performance.
